San Carlos de Bolívar, BA, Argentina (Remote / Hybrid NY)

PROFESSIONAL SUMMARY

AI Solutions Architect and Product Engineer with 3+ years of experience building autonomous agents and conversational workflows, combined with 4+ years of customer-facing solutions consulting. Expert in integrating Large Language Models (Claude, OpenAI) using advanced prompting techniques (Few-Shot, Chain-of-Thought) and structuring modular automation workflows with n8n. Proficient in engineering secure multi-tenant architectures (RBAC Custom Claims) and offline-first data engines. Strong communicator skilled in requirements gathering, operational audits, and translating enterprise bottlenecks into robust software solutions.

CORE COMPETENCIES

Conversational AI & Agent Design

Prompt Engineering (Few-Shot, CoT)

n8n Workflow Automation

React Native & Expo SDK

Offline-First Architectures

Multi-Tenant Security (RBAC)

Technical Solutions Consulting

System Auditing & Requirements Mapping

TypeScript & Node.js

WORK EXPERIENCE

Antigravity Studio

March 2022 - Present

AI Solutions Architect & Lead Product Engineer (Freelance)

Bolívar, Argentina (Remote)

- AI & Agentic Workflows:** Integrated Claude and OpenAI API modules directly into production mobile workflows using structured few-shot prompting, enabling automated data analysis and processing of operational queries.
- Workflow Automation:** Architected multi-stage automation pipelines via **n8n**, integrating Airtable, Gmail, and custom database APIs to reduce repetitive administrative workloads by 40%.
- Offline-First Systems:** Designed and deployed 5+ production-ready React Native applications utilizing local SQLite storage synchronized with Firestore, guaranteeing 100% data integrity in connection-less or rural environments.
- Enterprise Security:** Implemented robust multi-tenant security layers and role-based access control (RBAC) rules using Firebase Security Rules and Custom Claims, securing client data across systems.

Maipú Seguridad

January 2025 - May 2026

Systems Operations Auditor

Bolívar, Argentina

- Technical Auditing:** Diagnosed critical GPS tracking and QR-code validation failures in legacy mobile guard patrol applications, producing a comprehensive technical proposal for system migration to React Native.
- Stakeholder Translation:** Bridged the communication gap between field operators and executive management, translating operational pain points into actionable system design specifications, reducing reporting failures by 40%.
- Protocol Design:** Formulated new standard operating procedures integrated with modern mobile tools, streamlining incident reporting and dispatch.

Custodiar Seguridad / La Perla

June 2020 - May 2024

Technical Solutions Consultant

Bolívar, Argentina

- Solutions Consulting:** Advised enterprise and residential clients on integration architectures for advanced electronic security hardware, custom web platforms, and automated alert systems.
- Requirements Mapping:** Led technical discovery workshops to map client requirements and designed custom interactive UI mockups, securing key corporate contracts and improving client workflow efficiency by 30%.
- Technical Support:** Maintained and optimized internal web support portals, resolving customer queries and software integration bugs.

KEY PROJECTS

Sentinel OS System Design & AI

A mobile security operating system featuring tamper-proof real-time GPS logging, offline-first SQLite synchronization, and automated QR-code verification checkpoints. Built as a direct solution to audited legacy system vulnerabilities.

Tech Stack: React Native, Expo, SQLite, Firebase Auth, Firebase Security Rules

TechZone (Offline-First E-Commerce) Full Stack

An offline-ready e-commerce platform designed to operate seamlessly in remote regions. Employs local databases with complex conflict-resolution synchronization schemas.

Tech Stack: React Native, Redux Toolkit, SQLite, Firebase Firestore, Firebase Auth

3D Parametric Modeling & Prototyping Hardware & Design

Designed custom mechanical components and figures using Blender, compiling prototypes, and executing high-precision additive manufacturing (3D printing) using a Hellbot Magna 2 printer. Intersected digital workflows with physical fabrications.

Tools: Blender 3D, Hellbot Magna 2 (3D Printing), Precision Parametric Design

EDUCATION & CREDENTIALS

Specialization in Cybersecurity (Postgraduate)	2024 - 2025
Universidad Nacional de General Sarmiento	
Mobile App Development Specialization (React Native)	2025 - 2026
Coderhouse	
Full Stack Development Certification (MERN)	2023 - 2024
Coderhouse	
Technical Agricultural Production degree	2005 - 2011
Escuela Agrotécnica Salesiana (EAS) Del Valle	
Acquired hands-on technical management, logistics planning, and operational coordination skills within a rigorous agricultural and technical setting.	

ADDITIONAL CERTIFICATIONS & LEADERSHIP

Diploma in New Technologies	UTN Regional Córdoba	2022
Community Leader & President of Juventud Radical La Plata	Political & Social Organization	2018 - 2020

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML5, CSS3, SQL, Solidity (Blockchain), Spanish (Native), English (Technical)

Frameworks: React Native, React, Expo SDK, Node.js, Express.js, Next.js

Databases & Cloud: SQLite, Firebase Firestore, Supabase, PostgreSQL, MongoDB, Docker

Workflow & AI: n8n Automation, Prompt Engineering (Claude, OpenAI API), Conversational UX

Security & 3D: OWASP Mobile Top 10, Multi-Tenant Authentication (RBAC), Blender 3D, Additive Manufacturing (3D Printing)

Leadership: Public Relations, Team Management, Requirements Discovery, Technical Presentations
