PROFESSIONAL SUMMARY

Product Engineer, Mobile Developer (React Native), and Agricultural Production Technician with a hybrid background in software development, 3D modeling, and technical sales consulting. Expert in designing and implementing resilient Offline-First mobile architectures (SQLite + Firestore) and automating integrations with n8n. Noted for a unique ability to translate real-world and rural operational/logistical needs into efficient digital systems and functional physical prototypes using Blender and 3D printing.

CORE COMPETENCIES

React Native (CLI / Expo SDK) | TypeScript | Redux Toolkit | Node.js | Express | Supabase RLS | Firebase

LANGUAGES & TECHNOLOGIES

Development & Backend: React Native (CLI / Expo SDK), TypeScript, Redux Toolkit, Node.js, Express, Supabase RLS, Firebase, SQLite, PostgreSQL, MongoDB, Convex
AgTech & Drones: Drone field mapping & remote sensing, LoRaWAN IoT telemetry, Good Agricultural Practices (GAP), Integrated Pest Management (IPM)
Sales & Leadership: Consultative negotiation, security project design (CCTV, access control), team management, public speaking
Modeling & Web3: Blender 3D, 3D Printing (Hellbot Magna 2), Solidity, Ethers.js, Base L2, Docker, n8n, Git, GitHub
Languages: Spanish (Native), English (Technical)

WORK EXPERIENCE

Arbizu Labs, Remote March 2022 - Present

MOBILE DEVELOPER & PRODUCT ENGINEER (FREELANCE)

- Designed and implemented 5+ Offline-First React Native mobile applications and prototypes using SQLite and Firestore, preventing sync data loss in rural areas with zero cellular connectivity.
- Developed automated data integration workflows with n8n, reducing administrative management and development task processing times by 40%.
- Integrated 2 Large Language Model APIs (Claude and Gemini) to automate data analysis and chat interfaces across 3 mobile applications.
- Designed in Blender and 3D-printed over 10 custom mechanical spare parts, successfully resolving hardware failures in field machinery.
- Designed multi-tenant mobile security architectures using Firebase Security Rules and Custom Claims, guaranteeing absolute data isolation for clients.

Maipú Seguridad, Bolívar, Argentina January 2025 - May 2026

SECURITY GUARD & WATCHMAN

- Conducted access control and periodic physical inspections across 2 corporate facilities, managing the secure registration of over 60 weekly entries.
- Coordinated the daily operational security incident report sent to the operations management team.

La Perla Centro Comercial, Bolívar, Argentina January 2023 - May 2024

SALES ASSOCIATE & CUSTOMER SUPPORT

- Managed the full cycle of direct sales and customer service, consistently meeting commercial sales targets.
- Managed daily cash registers and stock replenishment for over 800 inventory items, maintaining 0% discrepancy.
- Collaboró actively in the maintenance and optimization of the store's commercial website.

Custodiar Seguridad Inteligente, Quilmes, Argentina 2020 - 2021

TECHNOLOGY & SALES CONSULTANT

- Consistently exceeded quarterly sales targets by 15% through consulting and sales of CCTV and alarm security systems.
- Advised corporate and private clients on the selection and integration of custom electronic security solutions (alarms, CCTV, access control).
- Collaborated with the technical support team in the preventive maintenance of clients' internal web interfaces.

Satelital Argentina, CABA, Argentina 2014 - 2016

SALES SPECIALIST

- Exceeded weekly sales targets by securing an average of 10 weekly and 40 monthly sales of diverse financial products (Classic, Platinum, and Signature accounts).
- Managed active commercial relationships with an active portfolio of over 80 key banking clients.

Social Assistance Project Coordinator

- Led volunteer teams and coordinated logistical campaigns for distributing social assistance to local soup kitchens and NGOs.

KEY PROJECTS

TitanFlow (Production)

Multiprocess algorithmic trading bot across 3 blockchain networks (Ethereum, Base L2, Polygon) for DEX alerts and arbitrage. Live at titanflow.aldoarbizu.com.

Aureus (Prototype)

Developed a multi-chain dashboard (Next.js, Supabase, The Graph, Ethers.js) for DeFi portfolio tracking integrating Aave, Compound, Curve, Balancer, and Lido.

AgroMarket Pro (In Development)

Designed a storage portal featuring FLIR thermal simulation on an interactive canvas and the AgroPool algorithm, reducing local logistics transport rates by 30%.

EcoConnect (Prototype)

Developed a multi-tenant dashboard with Supabase RLS that processes LoRaWAN IoT sensor telemetry, visualizing dynamic SVG curves and 3D isometric maps.

MakerPrint P2P (Prototype)

Developed a Kotlin mobile app that automates 3D filament quoting using the Gemini Slicer API and secures escrowed P2P payments.

TechZone (Demo)

Implemented a local-first e-commerce app with React Native, Expo, and SQLite, guaranteeing 100% transactional uptime with zero network connectivity.

Sentinel OS (Prototype)

Designed a mobile security prototype that audits GPS coordinates and encrypted QR code scans to certify security rounds.

EDUCATION

Specialization in Mobile Application Development (React Native) Coderhouse (Completed)	Graduated: 2026
Graduate Diploma in Cybersecurity Management Universidad Nacional de General Sarmiento, Argentina (Completed)	Graduated: 2025
Full Stack Web Development (MERN) Coderhouse (Completed)	Graduated: 2024
Graduate Diploma in New Technologies UTN Regional Córdoba, Argentina (Completed)	Graduated: 2022
Analyst in Information and Communication Technologies (ICT) Universidad Nacional de La Plata, Argentina (Incomplete)	2019 - 2020
B.S. in Agricultural and Forestry Sciences Universidad Nacional de La Plata, Argentina (Incomplete)	2012 - 2016
Associate Degree in Agricultural Production Escuela Agrotécnica Salesiana (EAS) Del Valle, Argentina (Completed)	Graduated: 2011

CERTIFICATIONS

- * Completed coursework in soil science, animal nutrition, plant physiology, and completed the Rapeseed Cultivation accreditation.
- * Completed hands-on field practices in dairy operations, traditional cropping, and precision livestock management.
