San Carlos de Bolívar, BA, Argentina (Remote)

PROFESSIONAL SUMMARY

Forward Deployed Engineer and Full-Stack Developer with 3+ years of experience building client-facing digital products and 4+ years of technical sales consulting. Power user of AI-assisted engineering tools (v0, Cursor, Claude API, OpenAI API) specialized in rapid prototyping, interactive mockups, and Next.js / React / React Native frontends. Expert in designing offline-first architectures (SQLite + Firestore) and workflow automation pipelines (n8n). Adept at bridging the gap between business requirements and clean code, leading technical discovery workshops, and delivering high-value solutions for complex client needs.

CORE COMPETENCIES

React, Next.js & TypeScript	AI Prototyping (v0, Cursor, LLM APIs)	React Native & Expo SDK	Solutions & Sales Engineering
n8n Automation Pipelines	Offline-First Mobile Systems	Requirements Discovery & UI Mockups	Multi-Tenant RBAC Security
Blender 3D & Hardware Prototyping			

WORK EXPERIENCE

Antigravity Studio

March 2022 - Present

Forward Deployed Engineer & Lead Product Developer (Freelance)

Bolívar, Argentina (Remote)

- Rapid Prototyping & AI:** Used v0 and Cursor to dramatically accelerate frontend development cycles, shipping complex interactive React templates and mockups within days to facilitate client feedback loops.
- Full-Stack & Mobile Delivery:** Deployed 5+ production-grade React Native and React web apps, integrating RESTful APIs and real-time synchronization databases (Firestore + local SQLite).
- Workflows & Integration:** Engineered automated backend pipelines with **n8n** to streamline notifications, synchronization, and database updates, reducing manual admin workloads by 40%.
- Access Management:** Implemented robust security layers with Firebase Custom Claims and Security Rules, ensuring fine-grained, role-based access control (RBAC) for multi-tenant enterprise setups.

Maipú Seguridad

January 2025 - May 2026

Technical Systems Auditor & Solutions Specialist

Bolívar, Argentina

- Problem Diagnostics:** Analyzed critical failures in legacy systems (GPS mapping, QR logging) and compiled technical specs to steer a migration roadmap toward modular React Native architectures.
- Cross-Functional Collaboration:** Translated operational bottlenecks of field operators into technical tasks for engineering, reducing patrol reporting failures by 40% and aligning business goals with developer velocity.

Custodiar Seguridad / La Perla

June 2020 - May 2024

Solutions Engineer / Technical Sales Consultant

Bolívar, Argentina

- Client-Facing Engineering:** Led technical discovery sessions with corporate clients to design electronic integration proposals, matching client needs with custom security platform features.
- Mockup & UX Design:** Created visual prototypes and UI wireframes to demonstrate platform capabilities during pre-sales workshops, securing major enterprise contracts and boosting user workflow efficiency by 30%.
- Integration Support:** Supported clients with API integrations and maintained customer-facing web ticketing systems.

KEY PROJECTS

Sentinel OS Rapid Prototyping & Security

A mobile guard patrolling operating system with automated QR checkpoint verification, offline-first local SQLite caching, and anti-tampering GPS tracking. Built as a proof-of-concept to solve audited operations failures.
Tech Stack: React Native, Expo, SQLite, Firebase Security Rules, TypeScript

TechZone (Offline-First E-Commerce) Full Stack React

An offline-first e-commerce system built for regions with unstable signal. Uses complex local-first data synchronization patterns.
Tech Stack: React Native, Redux Toolkit, SQLite, Firebase Auth & Firestore

3D Blender Modeling & Additive Printing Hardware & 3D Web Prep

Modeled custom mechanical spare parts and personalized figures in Blender, compiling assets and printing them on a Hellbot Magna 2 3D printer. Bridged parametric digital files with physical reality.
Tools: Blender 3D, Hellbot Magna 2 (3D Printing), Precision Parametric Modeling

EDUCATION & CREDENTIALS

Postgraduate Specialization in Cybersecurity	2024 - 2025
Universidad Nacional de General Sarmiento	
Mobile App Development Specialization (React Native)	2025 - 2026
Coderhouse	
Full Stack Development Certification (MERN)	2023 - 2024
Coderhouse	
Technical Agricultural Production degree	2005 - 2011
Escuela Agrotécnica Salesiana (EAS) Del Valle	
Gained valuable training in logistics coordination, project scheduling, and structured documentation inside an active agricultural operation.	

ADDITIONAL CERTIFICATIONS & LEADERSHIP

Diploma in New Technologies	UTN Regional Córdoba	2022
University Activist & President of Juventud Radical La Plata	Community Outreach & Leadership	2018 - 2020

TECHNICAL SKILLS

Frontend & AI: Next.js, React, React Native, TypeScript, TailwindCSS, Expo SDK, v0, Cursor, Prompt Engineering
Backend & Automation: Node.js, Express.js, n8n Workflow Automation, REST APIs, JSON integration
Cloud & Databases: SQLite, Firebase (Auth/Firestore), Supabase, PostgreSQL, MongoDB, Docker, Git/GitHub
Security & RBAC: OWASP Mobile Top 10, Firebase Custom Claims & Security Rules, Web Security
3D Design & Hardware: Blender 3D (Asset modeling), Additive Manufacturing (Hellbot Magna 2 3D Printing), Drone Pilot
Soft Skills: Technical Sales, Client-Facing Discovery, Rapid Prototyping, Requirements Auditing, Public Speaking
